Examiner's Reasons for Allowance

1. The following is a statement of reasons for the indication of allowable subject matter: In light of the Applicant's arguments, examiner agrees that prior art of record fails to teach the claimed apparatus. In particular, Blank and Knepper, fail to teach the slide with the base plate and stripper plate in which an inclined drag element is secured to the base plate and actuates the slide such that it opens the male mold cones in a detachment stroke. The hydraulic drive completely opens the male mold cones and the hydraulic drive being secured to the slide and rests against the stripper plate. The closest prior art, Blank teaches hydraulic drives, but does not teach the drive being on a slide and for a step on the inclined drag element to actuate the slide for a detachment stroke. Knepper teaches a cam unit and a detachment stroke but not a slide nor a hydraulic drive on a slide. The admitted prior art also does not teach a hydraulic drive on the slide nor a step for producing a detachment stroke on the slide.

Response to Arguments

2. Applicant's arguments filed 9/26/08 have been fully considered and persuasive and the previous rejections of the claims have been withdrawn.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. EP0873840A1 and DE3619595A1.
